

**Palestinian Central Bureau of Statistics (PCBS) and Ministry of Health (MOH) Issued a Statistical Report on the Environmental Survey for Health Facilities (Governmental and Non-Governmental) 2014**

**93% of Health Facilities in Palestine are Supplied with Water from the Public Water Network**

The survey results revealed that 93.0% of health facilities (governmental and non-governmental) in Palestine are supplied with water from the public water network, 14.9% purchase water tanks, 9.8% of health facilities rely on a rain water collection well, and 1.4% are supplied from other sources.

**Percent of Health Facilities in Palestine by the Sources of Obtaining Water, 2014**

**A round 87 Thousand Cubic Meters of Water are Consumed Monthly by Health Facilities**

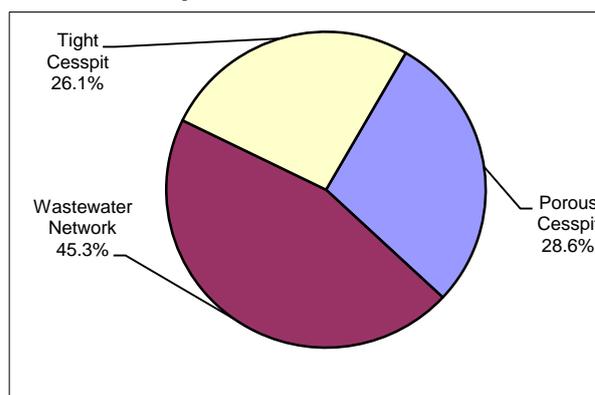

The estimated quantity of water consumed by health facilities (governmental and non-governmental) in Palestine was 86.7 thousand cubic meters per month in 2014, (59.6 thousand cubic meters per month in

the West Bank, and 27.1 thousand cubic meters per month in Gaza Strip).

**Less than Half of Health Facilities Used Wastewater Network to Dispose of Wastewater**

Data showed that 45.3% of health facilities (governmental and non-governmental) in Palestine dispose of wastewater via the wastewater network, 28.6% use a porous cesspit, and 26.1% use a tight cesspit, and 2.2% of health facilities treat the wastewater.

**Percentage Distribution of Health Facilities in Palestine by Wastewater Disposal Method, 2014**

**Around 381 Tons of Solid Waste are Produced Monthly in Health Facilities**

The estimated monthly quantity of solid waste generated by health facilities (governmental and non-governmental) in Palestine in 2014 was 381 tons: 277 tons in the West Bank and 104 tons in Gaza Strip.

Data showed that 81.3% of health facilities used metal containers for the solid waste, and 17.7% of them used plastic containers.
